

Abstract

5 A brush/scrapper device cleans dirt and debris from the soles of outdoor sports shoes, such as the cleats of golf or other such shoes. The device is a single piece frame having a body portion to which a brush is mountable and an appendage portion for engaging a bumper. The frame being a single piece bent to form the body and appendage portions and is removably mountable on the bumper of a vehicle like a golf cart without modification of the vehicle.
